January 2015

Happy New Year! We here at Acorn hope that 2015 is off to a wonderful start for you and your family. While we can't predict with any certainty what the investment markets will do this year (nor can any of the prognosticators and speculators on TV), we do believe that international investments should be a key part of your long-term plan. Our first article highlights some important and powerful points on why investing internationally makes sense in both up and down markets.

If you, like me, have children (or grandchildren) in college, then you know that it can be challenging for them to determine what they want to be when they graduate. Our selection on "Great Careers for Today's College Kids" may be able to offer some insights and ideas on their next steps.

January is a time when our New Year's resolutions are first put to the test. Make sure you start they year off on the right foot by reviewing our list of 50 ways to improve your finances in 2015. The key is to identify 2 or 3 ideas that are practical for you and that can be put into practice.

Lastly, while we brace ourselves for the winter weather to come, we've included a slideshow of travel ideas to help you consider taking a January vacation.

Best Regards,

The Acorn Team
